## **Surplus Equipment Inventory**

From time to time, 46 Productions retires equipment that has been replaced or is no longer needed or used to provide our services and products. The following list details our current surplus inventory. All equipment is studio use only and has not been used outside of the studio for any reason or purpose. Manuals and accessories are usually available. In some rare cases, we may even have the original boxes. Contact us by phone or email to discuss the equipment you are interested in to arrange for a demonstration or purchase.

TERMS: Prepaid. Cash, Visa, MasterCard.

PRICES: Firm. However, I will consider all reasonable offers.

SHIPPING & INSURANCE: Paid by purchaser.

CONDITION: All equipment is in working order unless otherwise stated. Repairs, if any, performed by authorized service centers. Operational status will be verified before shipment or delivery. Equipment can be inspected at our location.

RETURNS: None. Make sure you want it before you buy it. Equipment that is damaged in shipment should be reported to the shipping carrier.

**Yamaha ProMix01 Digital Mixer - \$695.00.**

With Yamaha rollaround stand and Rapco custom 16-channel snake. Studio use only. Excellent condition. Prefer not to ship.

**Digital Audio Labs Digital Only Card - \$10.00**

Standalone PC card for digital I/O in S/PDIF formats (coax). 16-bit ISA card requires AT Bus Slot. Supports 32, 44.1, 48kHz sample rates. Card is compatible with most Windows software. Features duplex operation (play while record) for overdubs and punch in/out with supporting software. If you need high quality two-channel 16-bit digital I/O for your computer system you can't go wrong with this card. I have latest Windows drivers that work with both Windows 95 & 98. This card is NOT plug & play. No manual but I have how-to and FAQs from Digital Audio Labs. I believe they will still provide tech support for this card but no software updates.

**JL Cooper PPS-1 MIDI-SMPTE Synchronizer - \$10.00**

Uses fixed rate SMPTE time code to provide audio/MIDI synchronization. Allows MIDI devices to sync to tape with song position pointer – ie, allows them to chase tape. Includes feature to convert SMPTE to MIDI Time Code (MTC). With manual and functioning power supply.
